

Facilities Management - Construction Services

	Stan	dard Operating Project Cl	•	?)
SOP No.	DC-7100		Revision:	2
Department:	Design &	Construction	Date:	6/11/09
Dept. Head Ap	proval:	CO	19/18/09	
Director Appro	oval:	Ste Fall	9/15/09	

Purpose

To establish guidelines for project managers closing out a project, ensuring that all electronic systems are closed properly, all project documentation is archived, and all appropriate departments are notified of the project being closed.

Responsibility

- 1. The following people are responsible for following this SOP:
 - 1.A. Managers
 - 1.B. Project Managers
 - 1.C. Project Coordinators
 - 1.D. Facilities Information Coordinator
 - 1.E. Document Control Supervisor
 - 1.F. Associate/Assistant Directors
 - 1.G. Supervisors
 - 1.H. Operations Managers
 - 1.I. Financial Analyst
 - 1.J. PM Administrative Support

Definitions

- 1. MAP: West Virginia University's financial system.
- 2. TMA: Facilities Management's computer maintenance management system/work order system.

Procedure

- 1. Project manager (PM) notifies facilities information coordinator of forecasted substantial completion date one month prior to reaching substantial completion.
- 2. PM completes the project information form (Exhibit A) and submits to the Facilities Information Coordinator.
- 3. Once substantial completion has been reached on a project, the PM enters the actual substantial completion date in TMA under the "user defined" tab in the field called "substantial completion."
- 4. PM reviews Project Closeout Checklist and ensures all deliverables have been received.
 - 4.A. **Yes;** PM transmits deliverables to the appropriate department per the Project Closeout Checklist.
 - 4.B. **No;** PM notifies contractor or architect/engineer of requirements.
- 5. PM notifies Preventative Maintenance group of all equipment in the project including existing equipment that will be taken out of service. Equipment data will be added to the preventative maintenance schedule per the Data Collection SOP. (See Closeout Checklist Exhibit E.)
 - 5.A. Include warranty information for all equipment.
- 6. PM, or A/E, completes room finish schedules including the following information: cleanable square footage, room type, type of flooring, paint colors, and any other pertinent finish information. PM sends this (electronic) data to Document Control and the Facilities Information Coordinator.
- 7. PM issues Project Hand-Off Notification (Exhibit B).
- 8. PM, or PM Administrative Support, should confirm that all Purchase Orders (PO) have been "received" and closed in TMA. This is accomplished by opening each requisition, entering the amount paid under "actual," entering a date under "delivered" and checking box to "close" the requisition.
- 9. For open POs, the PM gets a written statement from the vendor stating that they have billed in full against their PO. This is only required if there is an unpaid balance (open encumbrance) on the PO.
- 10. PM forwards vendor statements to Facilities EBO.
- 11. Facilities EBO works with Procurement Services to close the open encumbrances.
- 12. PM reviews any open work orders linked to the project in TMA and requests the appropriate supervisors to have the work order closed.
- 13. PM reviews all closed work orders in TMA linked to the project and verifies all charges. If there are any charges that are incorrect, the PM will need to work with Resource Management to make the corrections.
- 14. Once all of the work orders have been closed, the PM submits the project closeout memo (Exhibit C) to Resource Management.
- 15. PM gathers all purchase order documentation from Operations Coordinator and includes in project files.
- 16. Financial analyst will reconcile the project costs between MAP and TMA.
- 17. Once project costs are reconciled, the project is closed in TMA and submitted to the Facilities EBO.
- 18. If the project total is **greater than** \$10,000.00, PM completes Customer Summary Sheet (Exhibit D), including contacts for future problems, and forwards to customer.

- 19. PM updates Lessons Learned database on I-drive and completes contractor and A/E evaluations.
- 20. PM has project files boxed and sent to archives and sends any electronic record documents to Document Control. PM moves electronic project file on I-drive to Archive folder.
- 21. Process complete.

*Notes: PM to complete 1-year walkthrough prior to expiration of warranties.

PM should ensure that all open punchlist items, commissioning action items lists, and any other action items have been completed and signed off. Submit final signed off lists to the Associate Director of Design and Construction.
